#### PARTICIPATING RAIL CARRIERS [PA]

The following carriers are parties to this Classification under Powers of Attorney, Concurrences or Certificates issued to National Railroad Freight Committee, Agent.

ABBR	NAME OF RAIL CARRIER						
ATN	Alabama & Tennessee River Railway, LLC [A]						
ATR	Alliance Terminal Railroad, LLC [A]						
BNSF	BNSF Railway Company [A-1]						
BNSF	Burlington Northern and Santa Fe Railway Company, The [D-1]						
BRG	Brownsville & Rio Grande International Railway, LLC [C]						
CRL	Chicago Rail Link, LLC [C]						
CTRW	Carlton Trail Railway Company [A]						
ECBR	East Cooper and Berkeley Railroad Company[D-2].						
FCR	Fulton County Railway, LLC [A]						
GFRR	Georgia & Florida Railway, LLC [C]						
GRW	Gary Railway Company [A-2]						
GWR	Great Western Railway of Colorado, LLC [C]						
GWRC	Georgia Woodlands Railroad, LLC [C]						
HBRY	Hudson Bay Railway Company [A]						
IR KFR	Illinois Railway, LLC [A]						
	Kettle Falls International Railway, LLC [A]						
LC LSI	Lancaster and Chester Railway Company [A][E-1] Lake Superior & Ishpeming Railroad Company						
LVRB	Lehigh Valley Rail Management LLC – Bethlehem Division						
LVRJ	Lehigh Valley Rail Management LLC – Johnstown Division						
MJ	Manufacturers' Junction Railway, LLC [A]						
NKCR	Nebraska, Kansas & Colorado Railway, LLC [A]						
NOW	Northern Ohio & Western Railway, LLC [A]						
NSR	Newburgh & South Shore Railroad, LLC [A]						
PNR	Panhandle Northern Railroad, LLC [C]						
PR	Palmetto Railways [A-3]						
STE	Stockton Terminal and Eastern Railroad [A]						

[A] - Addition

- [A-1] Name changed pursuant to BNSF Adoption Notice 9000, effective January 24, 2005.
- [A-2] Addition Effective February 1, 2009 pursuant to GRW Adoption Notice 9000.
- [A-3] Addition Effective October 1, 2013, the South Carolina Division of Public Railways d/b/a Palmetto Railways consolidated the PUCC, PTR and ECBR into Palmetto Railways (PR).

[C] - Change

- [D-1] Canceled See [A-1] above.
- [D-2] Canceled Effective October 1, 2013, the South Carolina Division of Public Railways d/b/a Palmetto Railways consolidated the PUCC, PTR and ECBR into Palmetto Railways (PR).
- [E-1] Effective March 1, 2009 [PA] Partial Amendment.

RULE	SUBJECT	APPLICATION
		BOX STYLES
A1 (Continued) (Cancels 41 in original)	SUBJECT CORRUGATED OR SOLID FIBREBOARD BOXES	BOX STYLES SECTION 4 The following are descriptions of general styles of fibreboard boxes: (a) CONVENTIONAL SLOTTED BOXES; INCLUDING END LOADING BOXES: Box is manufactured from one piece of fibreboard which is scored and slotted to form a body having flaps for closing on each of two opposite faces. Lengthwise flaps either meet or overlap and inner flaps may meet depending on the particular style of box. (RSC, CSC, CSC, CSC, CSC, FOL and SFF). Slotted style boxes are also assembled from more than one piece of fibreboard and have only one closing face. (b) TELESCOPE BOXES: (1) Fill telescope box consists of body and cover sections of unequal depth, cover extending to bottom. (FTHS and FTD) (2) Partial telescope box consists of a body and cover sections of unequal depth. Cover section must extend over sides of bottom section not less than two-thirds the depth of the bottom section. (PTHS and PTD) (2) BOXES WITH COVERS: (1) Single cover box consists of body and cover sections, the cover section extending over sides of body section less than two-thirds the depth of the body. (HSC and DSC) (2) Double cover box consists of loined tube (body) and top and bottom covers, the covers extending over sides of body. (DC) (3) Interlocking cover box consists of noingle tube (body) with top and bottom 3 inch flanges and top and bottom covers having flanges which intendock with flanges of tube. (IC) (4) SLIDE STYLE BOXES: Box consists of snuly fitting telescope tubes, the outer tube being joined. (1) Duble silde or single lined silde box consists of three tubes arranged to provide at least one thickness of fibreboard on all six surfaces. (TS) (2) FOUERS: Box consists of on all six surfaces. (TS) (3) Three piece folder is constructed from targe piece of fibreboard. (1PF) (2) Two piece folder is constructed from targe piece of fibreboard. (SPF) (3) Three piece folder is constructed from targe piece of fibreboard. (SPF) (4) FIVER FOLDER: Box to fibreboard on three or thes six surfaces and usually a double thickness on the remaini
n onginal)		<ul> <li>an unbroken single thickness of fibreboard on three of the six surfaces and usually a double thickness on the remaining three surfaces of the box. (FPF)</li> <li>(g) RECESSED END BOXES: Box is assembled from a scored body sheet and two flanged end pieces forming recessed ends secured to body with staples spaced not more than 2 inches apart.         MANUFACTURERS' JOINT         (See Note)     </li> <li>SECTION 5 (a) SINGLEWALL OR DOUBLEWALL CORRUGATED FIBREBOARD: Boxes must have</li> </ul>
		<ul> <li>fastening the joint by one of the following methods:</li> <li>(1) With metal staples or stitches spaced not more than 2 1/2 inches apart, except that staples or stitches must be spaced not more than 1 inch apart when weight of box and contents is 140 pounds or more.</li> <li>(2) By firmly gluing the joint throughout the entire area of contact with a water resistant adhesive.</li> <li>(3) By fitting abutting edges forming joint close together and securing with sealing strips firmly glued to</li> </ul>
		<ul> <li>rupture of the joint occurs with fibre failure of one or more of the facings.</li> <li>(i) Sealing strips for boxes not exceeding 65 pounds gross weight or for two complete singlewall corrugated boxes must be not less than 2 inches wide and must be of not less than 60 pounds per 3000 square feet basis weight and having a bursting strength of not less than 60 psi. Sealing strips may be reinforced with glass fibres or other natural or synthetic fibres.</li> <li>(ii) Sealing strips for boxes exceeding 65 pounds gross weight, excepting two complete singlewall</li> </ul>
		<ul> <li>glass fibres or other natural or synthetic fibres. All plies must be firmly glued together.</li> <li>(b) TRIPLEWALL CORRUGATED FIBREBOARD: Boxes must have manufacturers' joints secured by one of the following methods:</li> <li>(1) By lapping the sides of the box forming the joint not less than two inches and fastening the joint with metal staples or stitches spaced not more than one inch apart. Both sides of the joint must be crush-rolled in the area of contact before stapling or stitching.</li> </ul>
		(2) By lapping the sides of the box forming the joint not less than three inches and firmly gluing the joint throughout the entire area of contact with glue or adhesive which cannot be dissolved in water after the film application has been dried under pressure.

RULE	SUBJECT	APPLICATION
RULE	SUBJECT	CERTIFICATE OF BOX MANUFACTURER SECTION 10(a) BOXES. (1) Boxes made to comply with the requirements of this rule must bear a legible certificate of a box manufacturer on an outside surface, guaranteeing that the boxes do so comply. Certificate must be of the form, size (3 inch diameter plus or minus 1/4 inch), type and wording as illustrated in either Sub-paragraphs (2) or (3) (see Notes 1, 2 and 3). City and state may be either that of the manufacturing or corporate location. (2) Example of certificates applicable to boxes made to comply with burst or puncture test.
